# 1 Introduction

## About You

You coordinate all activities around the case management (i.e. clinical management, isolation measures, transport, decontamination of residences or facilities, burial, psychosocial support). You immediately communicate results of laboratory investigations in case of *exercise disease* and Avian Influenza and thereby update the status of *suspected cases* to *confirmed cases*, *probable cases*, *non-cases* or *discarded cases* resp..

## Data for Exercise Disease

This booklet gives you all the data for your daily tasks on *exercise disease*. The data it contains, which have been generated by the SORMAS simulation, are invented especially for this pilot. Please do not worry, if some fields are named differently in the mobile app, the desktop app or this document resp.. For example, not all symptoms in the applications match those in this booklet. You are asked to put in some grain of salt here and there (indicated by text in *italic font*). All entered facts will trigger further action by various other users and will result in additional data. These *resulting data* will then be compared with the *expected data* to provide another evaluation method.

*Entries by the users are made from Monday to Friday only.*

## Tasks as Case Supervisor (ExD)

Concerning exercise disease<sup>1</sup>:

*before 10 AM*

<sup>1</sup> according to the daily information given in the tasks section of the day

1. Are there any cases that must be isolated? Display the list of all those cases.  
Create tasks for isolation for those cases who need it and assign it.
2. Are there any cases that need lab diagnosis? Display the list of all those cases.  
Create tasks for lab diagnostic verification for those cases who need it and assign it.
3. Display all lab requests that are overdue.  
*... number of requests overdue*
4. You receive the following lab information. Make sure it is properly documented in SORMAS-N.  
*... lab information for cases*
5. Are there any cases that can be discharged? Display the list of all those cases.  
Create tasks for those cases who need it and assign it. From those that have two

negative tests (48h apart) the following cases are symptom-free for at least 3 days.

*...list of cases (name with birth date)*

6. Are there any cases who died? Display the list of all those cases. Create tasks for the burial of those cases who need it and assign it.

*...list of cases (name with birth date)*

*after 3 PM*

7. Are there any tasks that need to be updated? Display a list of pending tasks and update their status.

*...list of tasks (name of case, task type and status)*

## 2 Daily Tasks (Case Supervisor)

Day 8 – 2015-06-08 – Mon 8 Jun

before 10 AM

1. Are there any cases that must be isolated? Display the list of all those cases.  
Create a task for isolation for those cases who need it and assign it.
2. Are there any cases that need lab diagnosis? Display the list of all those cases.  
Create a task for lab diagnostic verification for those cases who need it and assign it.
3. Display all lab requests that are overdue.

*There is no planed labrequest overdue today. If there are some, please invent some details.*

4. You receive the follwing lab information. Make sure it is properly documntented in SORMAS.

Lab info<sup>2</sup>

<sup>2</sup> Case – 197

Name	Eniola Odegbami
Sex ... Age ... DoB	female ... 61 ... 1954-05-26
Sample-Date	2015-06-08
Sample-Id	815380

### 3 *The End*

You have successfully reached the end of the SORMAS-N pilot. There are no more data for you to enter. Please do not forget to fill out the logbook and hand it in to Dr. Olawunmi Adeoye. We appreciate your feedback, which is of great importance for improving the performance of SORMAS.

*Thank you very much for participating in the SORMAS-N field test.  
We hope you had a pleasant time.*
